

Om Patel

+14378301333 | ompatelclg@gmail.com | linkedin.com/in/omcyber | github.com/omcyber10 | Montreal, QC

SKILLS

Detection & SOC : SIEM (Splunk, ELK), Log Analysis, Alert Triage, Threat Hunting, Threat Intelligence, IDS/IPS, Incident Response

Endpoint & EDR : LimaCharlie EDR, Detection Engineering, MITRE ATT&CK, Malware Triage, Forensics, Active Directory

Cloud Security : AWS IAM, Access Key Lifecycle Management, Automated Remediation, Least Privilege Enforcement, IAM Policy Design

Vuln. Management : Qualys VMDR, Vulnerability Assessment, Risk Assessment, Security Audits, Compliance, Security Policy Development

Tools : Wireshark, Nmap, Firewall Administration, Network Security, Kali Linux, Burp Suite, Redline, VirusTotal, PowerShell, Python, Bash

Frameworks : MITRE ATT&CK, NIST CSF, ISO 27001, CIS Controls, OWASP Top 10

PROJECTS

Endpoint Detection & Response Lab - LimaCharlie EDR

github.com/omcyber10

- Engineered a complete attack-detect-investigate cycle: deployed LimaCharlie EDR on Windows, executed LSASS credential dumping (MITRE ATT&CK T1003.001) via rundll32/comsvcs.dll, and triggered 4 high-severity detections - replicating a real Tier 1/2 SOC analyst workflow end-to-end.
- Developed 5+ custom behavioral detection rules targeting credential access techniques; triaged every triggered alert, correlated IOCs across process, file, and registry telemetry, and produced a formal investigation report with root-cause analysis and recommended containment actions.

AWS IAM Access Key Lifecycle Enforcement - Cloud Security

github.com/omcyber10

- Designed and deployed an automated IAM governance workflow that enumerated 20+ user accounts, flagged non-compliant long-lived access keys, and enforced automated deactivation - eliminating cloud credential risk with zero manual intervention.
- Implemented least-privilege IAM trust and permission policies with SES-based real-time alerting on remediation events; built using IAM roles, conditional policies, and event-driven automation patterns standard in enterprise cloud security.

EXPERIENCE

Cybersecurity Analyst

Jul 2023 - Jul 2024

Welwin Infotech Limited · Vadodara, India

Full-time | On-site

- Triaged 50+ daily SIEM alerts across multi-tenant environments; classified events into phishing, malware, unauthorized access, and traffic anomalies, escalating verified threats and discarding false positives to drive faster response across the team.
- Participated in incident response for 15+ confirmed security incidents - supporting containment, eradication, and recovery workflows while independently authoring post-incident reports documenting root cause, attack timeline, and remediation steps.
- Executed vulnerability assessments and security audits across 20+ production and customer environments, uncovering 10+ critical and high-risk findings - directly responsible for closing exposure on systems handling sensitive client data.
- Monitored endpoint and network traffic continuously using IDS/IPS, EDR telemetry, and packet-level analysis; detected anomalous behavior and unauthorized connections that became starting points for full incident investigations.
- Worked across customers in finance, healthcare, and SMB sectors as the on-call security analyst; translated complex findings into clear executive briefings that prompted concrete action, not just acknowledgment.

Cybersecurity Analyst Intern

Jun 2023

Welwin Infotech Limited · Vadodara, India

On-site

- Conducted vulnerability assessments and security audits to identify gaps in the organization's security posture; assisted in developing security policies aligned with industry best practices.
- Gained hands-on exposure to network monitoring and incident response workflows; collaborated with cross-functional teams to assess and mitigate security risks across systems.

Cybersecurity Specialist - Volunteer

Jan 2023 - Dec 2024

MHA Cyber Volunteer Program - CID Crime, Gujarat Police · India

Registered Program

- Formally registered under the Ministry of Home Affairs (MHA) national Cyber Volunteer portal - a government-recognized program run in collaboration with Gujarat Cyber Crime Cell to support law enforcement in combating cybercrime.
- Reported 30+ instances of malicious online content - phishing pages, fraud schemes, and unlawful material - directly to law enforcement via the MHA cybercrime reporting portal for investigation and takedown.
- Conducted in-person digital safety outreach to 100+ community members; educated everyday users on spotting online scams, fraud, and social engineering - translating complex threat concepts into practical, actionable guidance.

CERTIFICATIONS

- CyberOps Associate** (Cisco, Apr 2024)
- Google Cybersecurity Professional** (Google, Feb 2025)
- Qualys VMDR Specialist** (Qualys, Mar 2025)
- FCSS - Security Operations** (Fortinet, Sep 2024)
- Proofpoint Security Awareness Specialist** (Proofpoint, Jul 2025)

EDUCATION

Concordia University

2025 - 2026

Master of Engineering - Information Systems Security | GPA: 3.5

Montreal, QC, Canada

CHARUSAT (Charotar University of Science & Technology)

2020 - 2024

B.Tech - Information Technology | CGPA: 8.61

Gujarat, India
